

Church Security Scenario Training Helena, Montana – October 16, 2021

Time: 8:00am – 5:00pm

This course for church security personnel simulates real-world events that can happen and have occurred at churches across the country. Goals and objectives are outlined for each scenario, followed by critique and review.

Although we have a structured program, it is designed to facilitate continuous interaction, learning and Q&A.

We've created more than 25 training scenarios. In this seminar, we focus on several that are most relevant to church protectors and the needs of your particular church.

Topics include:

- Use of force for law enforcement vs. civilian protectors
- Less lethal vs. lethal application of force
- Non-linear use of force decision-making
- Verbal and physical de-escalation strategies
- Communication between protectors (verbal and non-verbal)
- Deadly force risk analysis and collateral damage avoidance
